

## 物理部 世界大会の経験を同級生に英語でプレゼン！

7月18日(火)、世界大会から帰国したばかりの物理部チーム「Remember」(岸田健吾さん・吉川優芽さん・溝上幸太さん)は、同級生に向けて世界大会での経験等を英語でプレゼンしました！

以下、生徒の感想です。

- ◆ 世界で4位と聞いてとてもびっくりしたし、何か自分に誇れることがある人はかっこいいなと思った。私も何か得意なことで才能を発揮して、自分の強みを持てる人になりたいと感じた。
- ◆ とても素敵な発表でした。詳しくはない分野なので、1を聞いて10を知るとはいきませんでした。素人にも分かりやすい英語とスライドで楽しい時間を過ごさせていただきました！
- ◆ 海外の人と実際に話して仲良くなるのは想像以上に難しそうではあるが、機会があれば海外の人と積極的に会話してみたい。
- ◆ 英語のプレゼンにも関わらず、とても聞き取りやすくスライドが丁寧だったので、ロボカップがどのようなものだったのか理解しやすかったです。素晴らしい発表だったため、私自身の勉強になり楽しかったです。
- ◆ Congratulations! I think you have created an exceptional robot. Your hard work and dedication leading up to the world final competition are truly wonderful. From camera technology to hardware, you've made great progress. The new robot looked very cool. You seem to have had many valuable experiences in France, and the pictures you shared with us were both beautiful and inspiring. They have made me want to visit Europe someday. Lastly, I want to thank you for your fantastic presentation.
- ◆ Your presentation was wonderful! Your English is excellent, and I truly appreciate it. All the pictures you showed us were incredibly beautiful, and they moved me deeply. I would love to take pictures like them. The entire experience was enjoyable and memorable for me. Thank you!
- ◆ I was surprised that you won the fourth prize and received the outstanding innovation award! The pictures you showed us were very beautiful. They made me want to travel to France in the future. Please take care of your body and watch out for jet lag!
- ◆ I am impressed with their results, despite the high level of the world competition, which were achieved through their hard work. I've learned the importance of having a wide viewpoint.

We've just finished all our activities for RoboCup, but I really want to contribute to the development of Robocup in the future. The experiences I gained this year, including the competition, as well as all the days we spent together building robots, should be valuable treasures for us.
